## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1, 3-30, 60-65 are allowed over prior art of record.

### ***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance:

Applicants' incorporation of previously indicted allowable subject matter in claims 1 and 60 places the claims in condition for allowance in view of prior art of record. In addition, claims 3-18 are also allowed as being directly or indirectly dependent of the allowed independent base claim.

Furthermore, after further search and consideration of applicants argument (see applicants' response filed on August 19, 2005 in Pages 17-19), it is determined that the prior art of record neither anticipates nor renders obvious the claimed subject matter of the instant application as a whole either taken alone or in combination, in particular, prior art of record does not teach "forming at least one opening in the first continuous trench for allowing coolant supplied from the active cooling apparatus to exit or enter the first continuous trench; and positioning the active cooling apparatus on the backside of the first semiconductor substrate," as recited in claim 19, "forming two openings in the continuous trench for respectively allowing coolant supplied from the active cooling apparatus to exit and enter the continuous trench, and positioning the active cooling apparatus on the backside of the semiconductor substrate," as recited in claim 61, and "forming an opening in the continuous trench, wherein coolant supplied from the active cooling apparatus passes through the opening; and positioning the active cooling apparatus on the backside of the semiconductor substrate," as recited claim 65 respectively.

Claim 20-30 and 62-64 are also allowed as being directly or indirectly dependent the allowed independent base claim.
